

# Morrison Rotary Mower – Cobra

---

Date of purchase: 11 November 2011  
Warranty: 2 years - expired  
Purchased from: Hornby Mega Mitre 10  
Servicing: Daly Kevin Mowers Ltd  
234 Riccarton Road

## Operating instructions

### Starting

1. Set throttle to  $\frac{1}{4}$
2. If cold, press orange primer bulb three times
3. Pull start cord

### Stopping

1. To stop, turn throttle to off position

### Refuelling

The four-stroke engine has separate oil and petrol fillers so fill with standard 91 octane petrol.

Petrol is stored in the small red plastic fuel container kept in the shed with the mower.

**DO NOT** confuse with the larger red plastic fuel container that holds diesel.

### Maintenance

Check oil level weekly. Unscrew the yellow oil filler cap and check the dipstick.

Top up with SAE 30 engine oil.

**DO NOT** use oil intended for cars.

### Caution

To access the underside of the mower, always tip the handles down and the front of the mower up. Always keep the spark plug uppermost.

### Changing oil

Every 50 hours of operation drain and replace the oil. Drain oil by tipping the handles down and the front of the mower up.

The mower takes about 600ml of SAE 30 engine oil.

### Mowing around obstructions

Mow with the obstruction (fence etc) to your left. The left-rear wheel is recessed and the height adjustment is on the right so it will not catch in the fence and be accidentally moved.

ONLY TILT THE  
MOWER WITH THE  
SPARK PLUG  
UPPERMOST.
